DHL	GLOBAL	Dalsey, Hillblom and Lynn - a Deutsche Post World Net company of Germany that provides international Mail, Express, Logistics and Finance. The company was founded in 1969 by Adrian Dalsey, Larry Hillblom, and Robert Lynn.
DHP	PH	Digital Health Platform - This term is replaced by HSDP
DHR	PH	Device History Record - the Device History Record (DHR) is a compilation of records containing the production history of a finished device. DHR's for each batch, lot, or unit are maintained to demonstrate that the device, and component modules, is manufactured in accordance with its DMRI module. The DHR may be a single record or a combination of receiving, in-process, final acceptance, manufacturing/assembly, and labeling records. The scope of activity is dependent on type, complexity, and number of processes involved. An acceptance form may be used as the record when only one operation is performed. Individual acceptance record forms may be combined with manufacturing record forms into a single form if it facilitates the process flow

PST	GLOBAL	Periodic Self-Test
PST	PH	Process Survey Tool - means of measuring the maturity levels of key business processes. They are practical tools aimed at helping managers improve their planning and decision-making processes, as well as giving them guidance on how to improve the processes. With the PSTs, organizations will be able to compare where they currently are, with where they would like to be, and provide direction on what to do to get to the next level. Higher Process Survey Tool scores - and therefore greater process maturity - should lead to improved business performance. For any organization, improving performance from Self-Assessment or other approaches means developing the whole network of processes through which the organization functions. The PSTs are fully compatible with the EFQM Excellence Model because processes lie at the very heart of the
