

IGT lecture and workshop

June 12-13, 2020

Location:

Philips
595 Miner Rd.
Highland Heights, OH

Objectives:

- This course is designed for interventional cardiology, vascular surgery and interventional radiology fellows looking to develop their skills for utilizing IVUS, physiology and imaging systems for the treatment of their patients. Ideal for fellows currently training in a Siemens, GE or Toshiba lab and transitioning to a Philips lab as an attending physician. If currently training in a Phillips lab, this program will increase your skills with Philip's imaging.
- Discuss how imaging technologies can be used to create personalized treatment algorithms for your patients.
- This program will have a coronary and peripheral track.

Faculty:

Dr. Jas Singh, MD
Associate Professor of Medicine,
Medical Director, Cardiac Catheterization Laboratory,
Director, Interventional Cardiology
