

CST Individual Learning Plan

(Phase 1 distance learning)

Clinical base knowledge	Rating	Comments
Knowledge of anatomy and medical terminology associated with core peripheral procedures		
Knowledge of disease state/pathophysiology that supports the indication for use of products within core peripheral procedures		
Knowledge of diagnostic and interventional procedural steps for core cardiac procedures		
Describe the key principles of physiologic lesion assessment		
Describe the key principles of coronary IVUS (pre-and post-intervention)		
Identify key structure of clinical paper and how to perform SWOT analysis		
Observe case and identify X-Ray equipment, cath lab layout		
Observe case and identify diagnostic vs interventional equipment and procedural workflows		

Technical system base knowledge	Rating	Comments
Recall System Competency Checklist to become familiar with pre-procedure set up, case workflow & functionality of physiology platforms		
Recall System Competency Checklist to become familiar with pre-procedure set up, case workflow & functionality of imaging platforms		
Recall disposable products (specifications) and clinical application as related to physiology		
Recall disposable products (specifications) and clinical application as related to IVUS imaging		
Knowledge of common troubleshooting issues relative to disposable products and systems		

Selling skills-related activities	Rating	Comments
Ability to access and review "How To Use Sales App 2.5" via iPad		
Ability to access and comprehend iPad documents & Apps as it relates to physiology (FFR, iFR, iFR Scout)		
Ability to access and comprehend iPad documents as it relates to imaging (ADAPT, DOABLE, CORE, & coronary IVUS education)		
Ability to manage your personal learning and development to prepare for CST		
Ability to identify the value proposition for physiologic lesion assessment		
Ability to identify the value proposition for IVUS imaging pre-and post-coronary interventions		
Ability to identify the value proposition for Philips IGTD partnership for customers as relates to healthcare standardization, patient outcomes, quality and economics		
Administrative-related activities	Rating	Comments
Completion of Vendor Credentialing and Certification process
