

Interventional neuroradiology customer questions

- Are you looking to establish or expand your stroke program?
- If you worked through neuro cases more efficiently, what would you do with the extra time? (example, add additional cases/send staff home on time, Azurion and SmartCT workflow efficiencies)
- How many of your RT's lack confidence using advanced tools such as 3DRA or XperCT/Cone Beam CT during neurointerventional procedures? (Discuss Guided 3D Acquisition)
- Is your team using advanced imaging tools to guide complex interventions? (Discuss Philips Neuro portfolio)
- What challenges does your team face when imaging complex neuro procedures? (Discuss Philips Neuro portfolio and Azurion workflow efficiencies)
- How well does your current imaging system visualize small vessels?
- How often do you encounter dose concerns during complex or routine procedures?
