

Hospital Name: Manatee Memorial Hospital, Bradenton, FL

Hospital Highlights: This hospital has been serving the community needs for 65 years with 319 beds. There is a full service cardiovascular team approach including structural heart, PCI and peripheral procedure. Manatee Heart and Vascular Center has 3 labs with Philips x-ray equipment including the CoreVision integrated systems.

Course Objectives: This is a great course on how to use laser in both coronary and peripheral. Dr. Mathews explains how Philips products can help facilitate patient care. He reviews the use of IVUS, iFR and laser in a variety of cases. The use and workflow for co-registration will also be demonstrated.

Target Audience: Introductory course for coronary-focused physicians that are interested in learning more about the use of Philips technology to prepare to see clearly and treat optimally in coronary and peripheral cases. This is a combo coronary and peripheral course.

Course trainers	S. Jay Mathews, MD	
Trained	Barnes-Jewish Hospital for internship, residency and fellowship	
Experience in years	8	

Course: Includes a didactic lecture the night before reviewing laser science and the use of Philips products. Dr. Mathews will review cases highlighting various products used to help treat both coronary and peripheral patients. The next day, participants will be in the lab watching Dr. Mathews perform a variety of coronary and peripheral cases observe techniques and ask questions. These are highly interactive programs.

Logistics: Round trip transportation to Tampa or Sarasota, FL. Hotel accommodation for one night. Transportation to the educational dinner the night before the course and to the hospital day of the course. Travel, transportation, hotel and dinner are reportable under the sunshine act.

Mimi Broussard and American Express Travel will help to coordinate all logistics.

If you have any questions, please reach out to your local Philips IGTD representative.
