**Tack**

## Reimbursement

Educating customers in compliant way on basic coding and reimbursement for Tack as new tech. Objection handling and guidance on Philips resources to help.

- ❑ As a new technology, every account should have a reimbursement walk through on the basic codes and payment to ensure the account understands reimbursement
  - ❑ Most new novel technologies discuss reimbursement – it is an expected conversation with novel technology introductions
  - ❑ It is unusual for a new concept such as Tack to have reimbursement available so early in commercialization, so make sure your customer understands Tack has reimbursement
- ❑ Ensure customer understands Tack's reimbursement as a type of stent
  - ❑ You are allowed to explain Tack is reimbursed as a type of stent (C-Code/HCPSC C-1876)
  - ❑ You are allowed to share the typical codes and national reimbursement listed in our [VAC Pack](#) and [VAC presentation](#) are the same as those for stenting in the SFA down to the tibials
  - ❑ However, we cannot give information on how to code procedures - forward those questions OR requests for a customized reimbursement guide with exact payments for your accounts, contact
    - ❑ Reimbursement Hotline- **916-281-2840**
    - ❑ Email: **IGTDReimbursement@Philips.com**
